Broadband Global Area Network (BGAN):

The new BGAN broadband satellite network uses geosynchronous satellites to keep you connected even from extremely remote locations using small portable terminals. BGAN can give you virtually any communication capability that you could need, including: high speed internet, voice, fax, SMS short messaging, 64 kbps ISDN, and streaming IP data for video or VPN applications. You can make voice calls while you are on the internet. Depending on the model selected, internet access reaches up to 492 kbps↓↑.

EXPLORER™ 700:

Designed for maximum feature depth and robustness, this terminal is a favorite of media and government users. The EXPLORER™ 700 has two Ethernet (RJ-45) ports and 802.11 a/b/g WLAN access. If that isn't enough, it offers USB and class I BlueTooth data connections. It has an IP 66 rated all-weather active antenna that can be mounted outside permanently and remoted from the transceiver by up to 70 meters. Two RJ-11 ports let you connect a analog phone (4 kbps voice) and a fax/modem device (ISDN 3.1 KHz audio) simultaneously to the terminal. An optional BlueTooth handset lets you talk wirelessly up to 100 meters from the terminal. You can select streaming data rates from 32 kbps to 256 kbps for applications that need assured Quality of Service such as VoIP, video, or VPN. Standard IP data reaches up to 492 kbps↓↑.

OPTIONS: cordless Bluetooth voice handset, corded voice handset, car charger, watertight impact case, external battery pack, solar charging system, SkyFile email/fax/video software, Vocality VoIP unit, SkyPipe data encryption unit/service, 10 and 30 meter antenna cables, Tandberg MXP Secure/Tactical Videoconferencing unit.

EXPLORER™ 727 (Vehicular BGAN):

Thrane & Thrane has a strong legacy of providing reliable land mobile terminals. This system gives your land vehicle access to Inmarsat's BGAN-X services even while in motion. Though its antenna is presented in desert tan, it is designed to stand up to cold, hot, or wet environments. Components include a fully integrated electronic tracking antenna, transceiver, IP handset with cradle, 5-m Ethernet cable, mounting kit, 12/24 VDC power cable, manual, and CD.

EXPLORER™ 700

shown with optional BlueTooth handset

- Standard data up to **492 kbps**↓↑
- Streaming data up to **256 kbps**
- Voice: Optional BlueTooth handset or optional analog phone using RJ-11 Port.
- Weight with battery: 7 lb (3.2 kg)
- Dimensions: 11.3"x15.6"x2"
- 2 RJ-11 Ports: 4 kbps voice, 3.1 KHz Audio
- 2 ISDN ports (voice, 64 kbps, 3.1 kHz audio)
- Data Access: Ethernet (Two RJ-45), USB 1.1, BlueTooth, WLAN (802.11a/b/g, 328 ft max)
- Removable Active Antenna: up to 229ft (70 m)
- Li-Ion Battery Performance:
 - 36 hrs of standby operation RT
 - 3.5 hrs download at 492 kbps (756 MB) RT
 - 1.5 hours upload at 492 kbps (324 MB) RT
 - Recharge time under 2.5 hours at RT
- AC Power: 100-240VAC 47-63Hz
- DC Power Requirements: 10-32 VDC
18 Watt during transmit; 60 W max during charging
- Ingress protection: Transceiver: IP52 Ant.: IP66
- Operating Temp: -13 to 131°F (-25 to +55°C)
- Humidity: 95% non-cond. humidity 40°C
