**USAGE CHARGES:**

HIGH SPEED services include 64 or 56 kbps high speed data, 64 kbps voice or speech, and 3.1 khz audio calls. Customer agrees that the purchase of prepaid minutes applies only to high speed services made to public switched telephone numbers (PSTN) and does not apply to other types of calls. Customer agrees that the purchase of prepaid minutes of high speed services is a non-refundable up-front purchase, and that additional prepaid minutes cannot be purchased after the rental equipment ships to customer. The customer understands and agrees that high speed services used in excess of the upfront prepaid usage purchased with the rental will cost and be billed at a rate of **\$7.50 per minute**. There is no refund for unused prepaid usage after the rental. Other types of calls will be billed at other rates (as specified in the SERVICES CHART). The customer is advised that calls to other satellite phones or satellite networks are billed at significantly higher rates (see SERVICES CHART). Outfitter Satellite reserves the right to put a cap on usage by the rental terminal unless a refundable deposit is supplied by the customer (in which case the cap will be no more than 150% of the deposit amount), and the customer is advised that Outfitter Satellite may put this cap in place at its own decision at anytime during the rental if it considers that excessively high usage is occurring.

<b>SERVICES CHART</b>	
<b>Type of Call</b>	<b>Rate</b>
Low speed voice and data calls made from terminal to Fixed Public Switched Telephone Numbers (PSTN) or GSM/cellular numbers	\$2.50 per min
Low speed voice and data calls received from terminal via two-stage dialing	\$2.50 per min
Low speed voice calls made to satellite networks ( Iridium, Thuraya, Inmarsat)	\$3.00 per min
High speed voice and data calls made to PSTN numbers	\$7.50 per min
High speed voice and data calls made to Inmarsat M4 satellite phones.	\$15.00 per min
High speed services made to any other satellite network and any other type of circuit switched call	\$20.00 per min
MPDS packet data	\$32.80 per MB

MOBILE PACKET DATA SERVICE (MPDS) is billed per MegaByte (MB) of data sent or received by the terminal. MPDS does not have a quality of service guarantee and is usually slower than 64 kbps circuit-switched high speed service. Customer understands that though MPDS is billed per MB of usage (not connection time), all other service types are billed per minute of connection time. Outfitter Satellite does NOT guarantee that MPDS is available on all rental Inmarsat M4 terminals, and if MPDS service is needed for the customer's application, the customer must state that in writing at the time of executing this contract. It is the customer's responsibility to be aware of the type and cost of the service he/she is using through the terminal, before making any call.

LIABILITY FOR LOST OR DAMAGED EQUIPMENT: Here is a list of retail values which would be used to determine the replacement cost for lost or damaged equipment: Thrane & Thrane Capsat Messenger terminal and antenna unit (\$8,995); internal NiMH or NiCad battery (\$300); USB to ISDN S/T adapter is (\$195), TNC-to-QLA pigtail with 0.5 to 1.0 meter cable length (\$150); 10-meter antenna cable with TNC-to-TNC connectors (\$199). If a rental unit is lost it should be reported to Outfitter Satellite immediately; the Customer is responsible for airtime or other usage that occurs prior to Outfitter Satellite barring service on the rental unit (which can take up to 2 business days).
